From Data to Decisions:
The Complete Performance Dashboard
for Your Clinic.

Are you flying blind?

As a clinic manager, you face daily challenges with complex, disconnected data.

Scattered Information: Patient data, billing records, and lab results are often siloed in different systems, making a unified view impossible.

Gut-Feeling Decisions: Without clear, consolidated data, critical choices about staffing, services, and spending are based on intuition rather than evidence.

Hidden Inefficiencies: It's difficult to pinpoint the root cause of issues like long patient wait times, low satisfaction scores, or high insurance rejection rates.

Tedious Reporting: Manually creating weekly or monthly reports is a time-consuming chore that takes you away from managing your clinic.

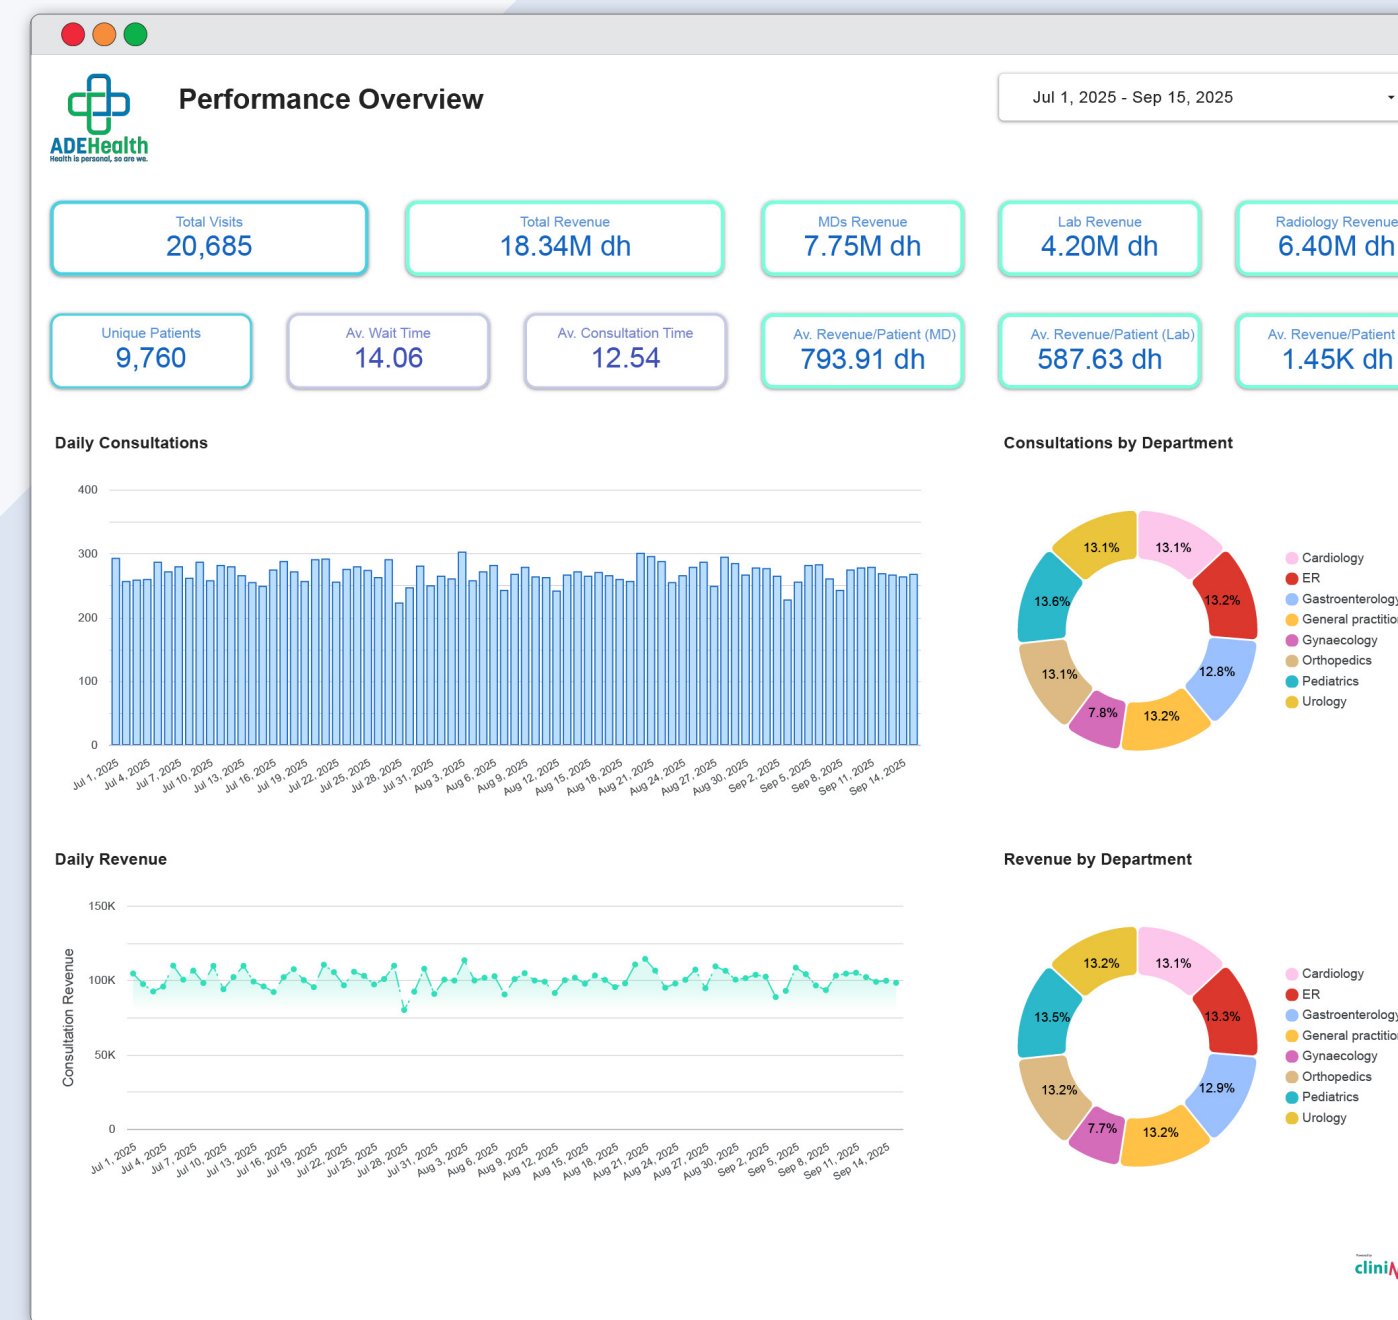

The solution: introducing **cliniMetrics**

Your clinic, clarified

cliniMetrics is an all-in-one performance dashboard, powered by Google Looker Studio, that transforms your raw operational data into your single source of truth.

It provides clear, interactive, and real-time visual insights into every aspect of your clinic's operations—from the front desk to the bottom line.

Stop chasing data. Start making decisions.

Why **cliniMetrics**? Your key to growth!

Unlock Actionable Insights, Instantly.

cliniMetrics allows you to track the KPIs that matter most, with the ability to drill down from a clinic-wide overview to the performance of a single doctor.

Optimize Revenue & Reduce Costs

Track consultation fees, lab revenue, and insurance claim success rates to instantly identify your most profitable services and plug financial leaks.

Boost Patient Satisfaction

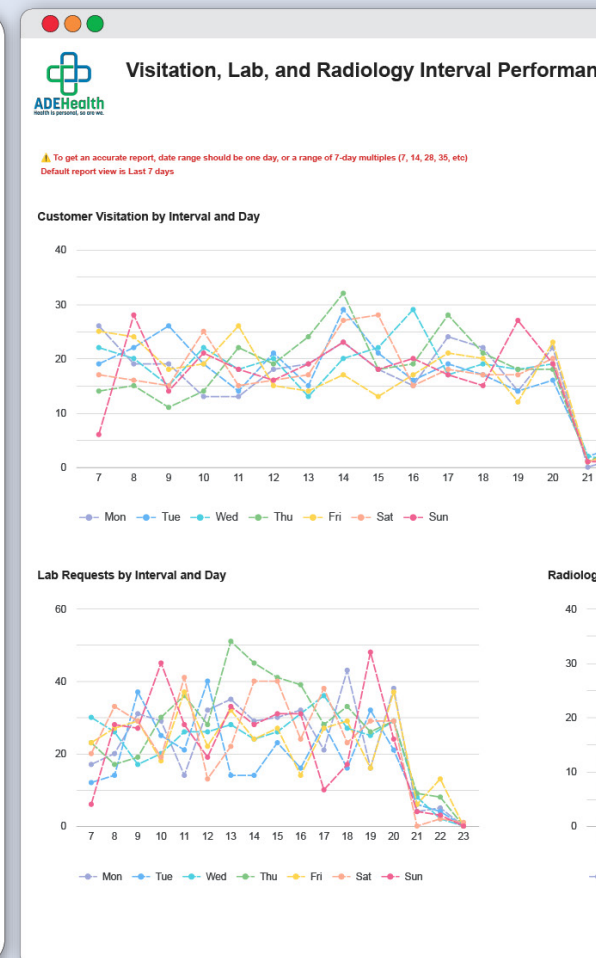

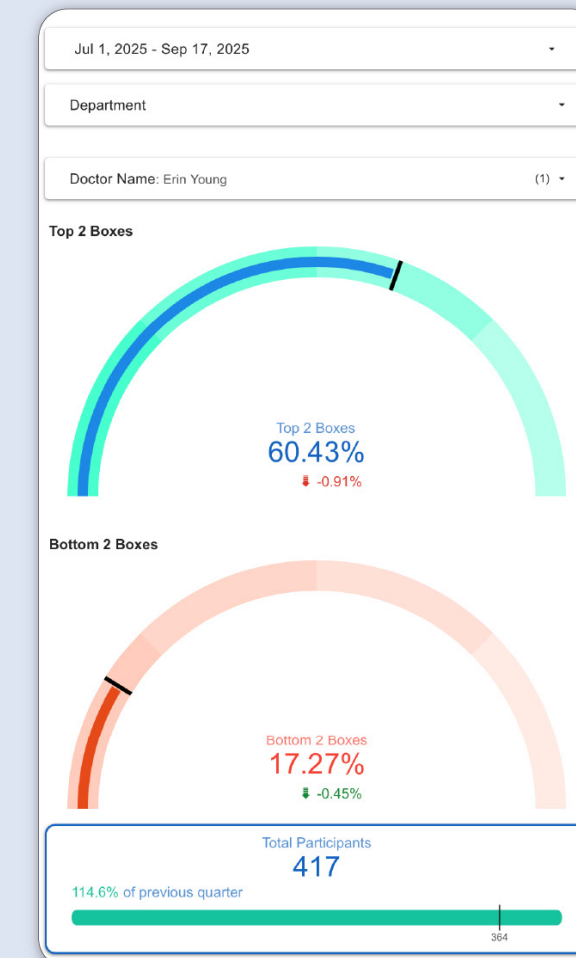

Correlate patient feedback with operational data to understand what drives a positive patient experience, helping you build loyalty and a stellar reputation.

Enhance Operational Efficiency

Monitor patient wait times, visit durations, and appointment types to identify bottlenecks and streamline your patient flow.

Empower your team

View performance metrics by department and doctor to recognize top performers, identify coaching opportunities, and foster a culture of excellence.

How It Works: A Simple, "Done-For-You" Process

Effortless Implementation, Powerful Results.

We know you're busy. That's why we handle all the technical setup. Our white-glove service ensures you're up and running in no time.

CONSULT & ASSESS

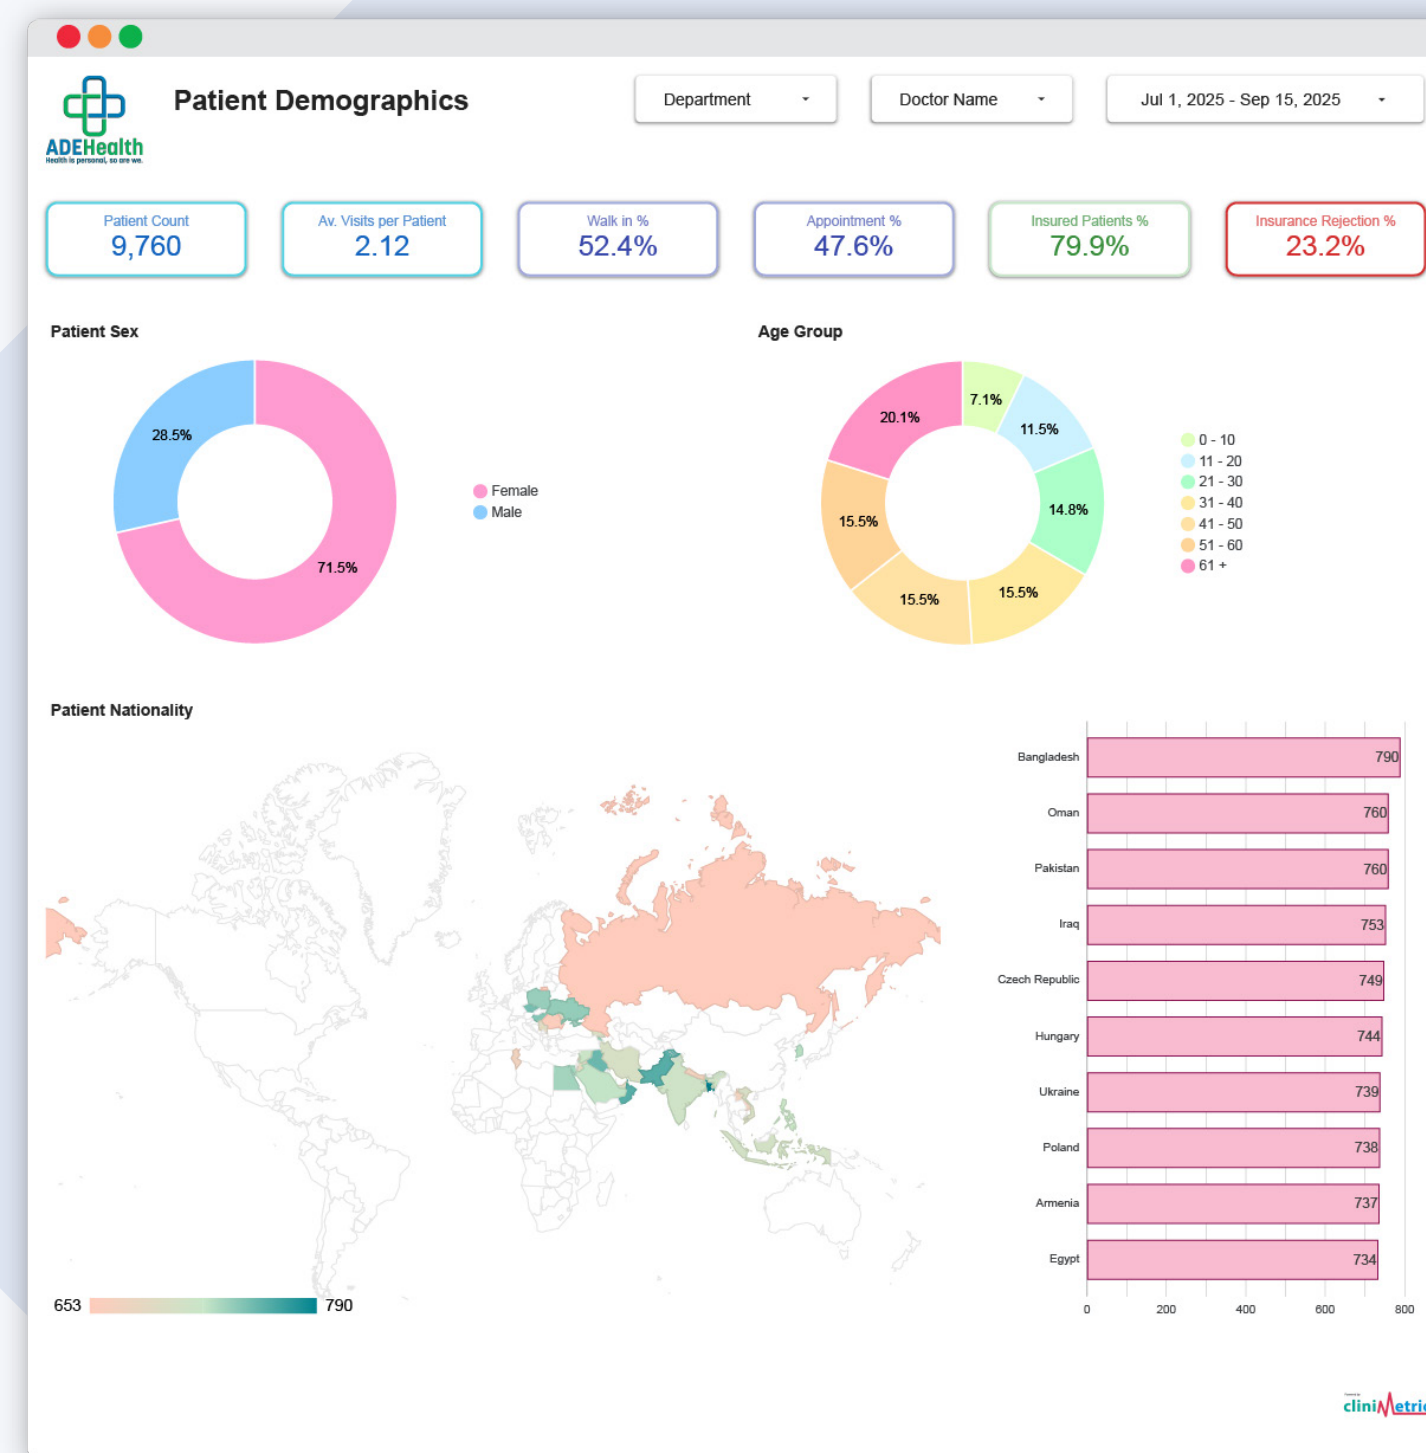

We start with a free consultation to understand your clinic's unique workflow, data sources, and key objectives.

CUSTOMIZE & DEPLOY

We create a simple, custom data entry template (e.g., in Google Sheets) and connect it to your secure, personalized dashboard.

TRAIN & EMPOWER

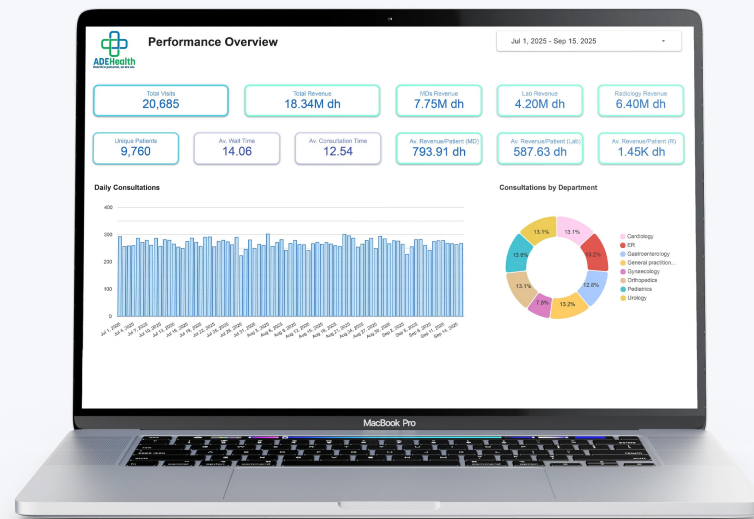

We conduct a hands-on training session with your staff to ensure they can update the data seamlessly as part of their daily routine.

Live Demo: See It in Action

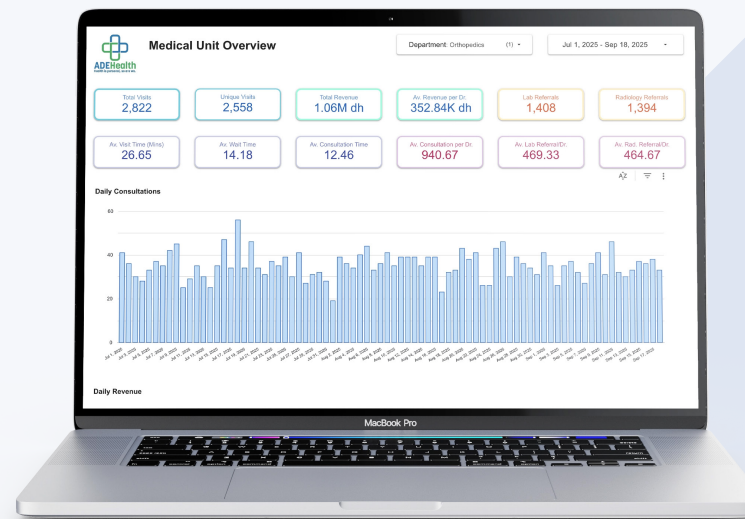

A Glimpse into Your Future Clinic.

Let's take a look.

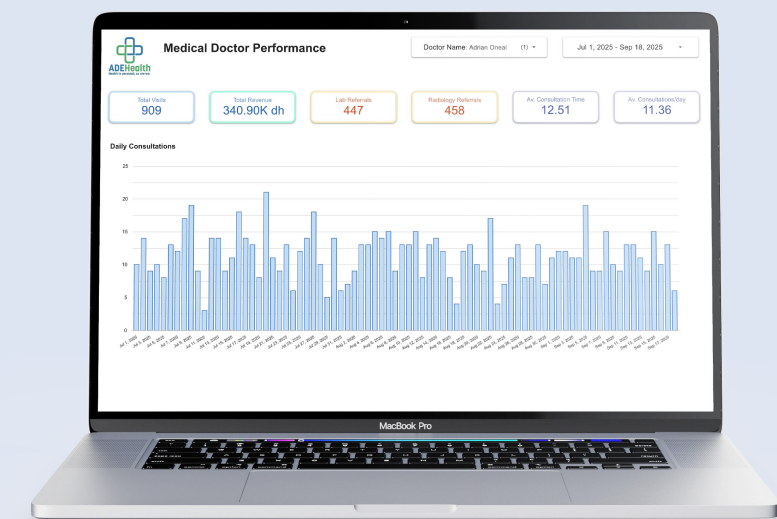

The 30,000-Foot View:

Here on the main screen, you see your clinic's vital signs at a glance—total revenue this month, patient volume, and overall satisfaction score.

Drill-down to a Department:

With one click, we can filter for the Cardiology department. Instantly, we see its specific revenue, number of procedures, and top-referring doctors.

Focus on an Individual:

Let's look at Dr. Smith. We can immediately see her patient load, average consultation revenue, and patient satisfaction scores, providing clear, objective performance data.

The Offer: A Smart, One-Time Investment

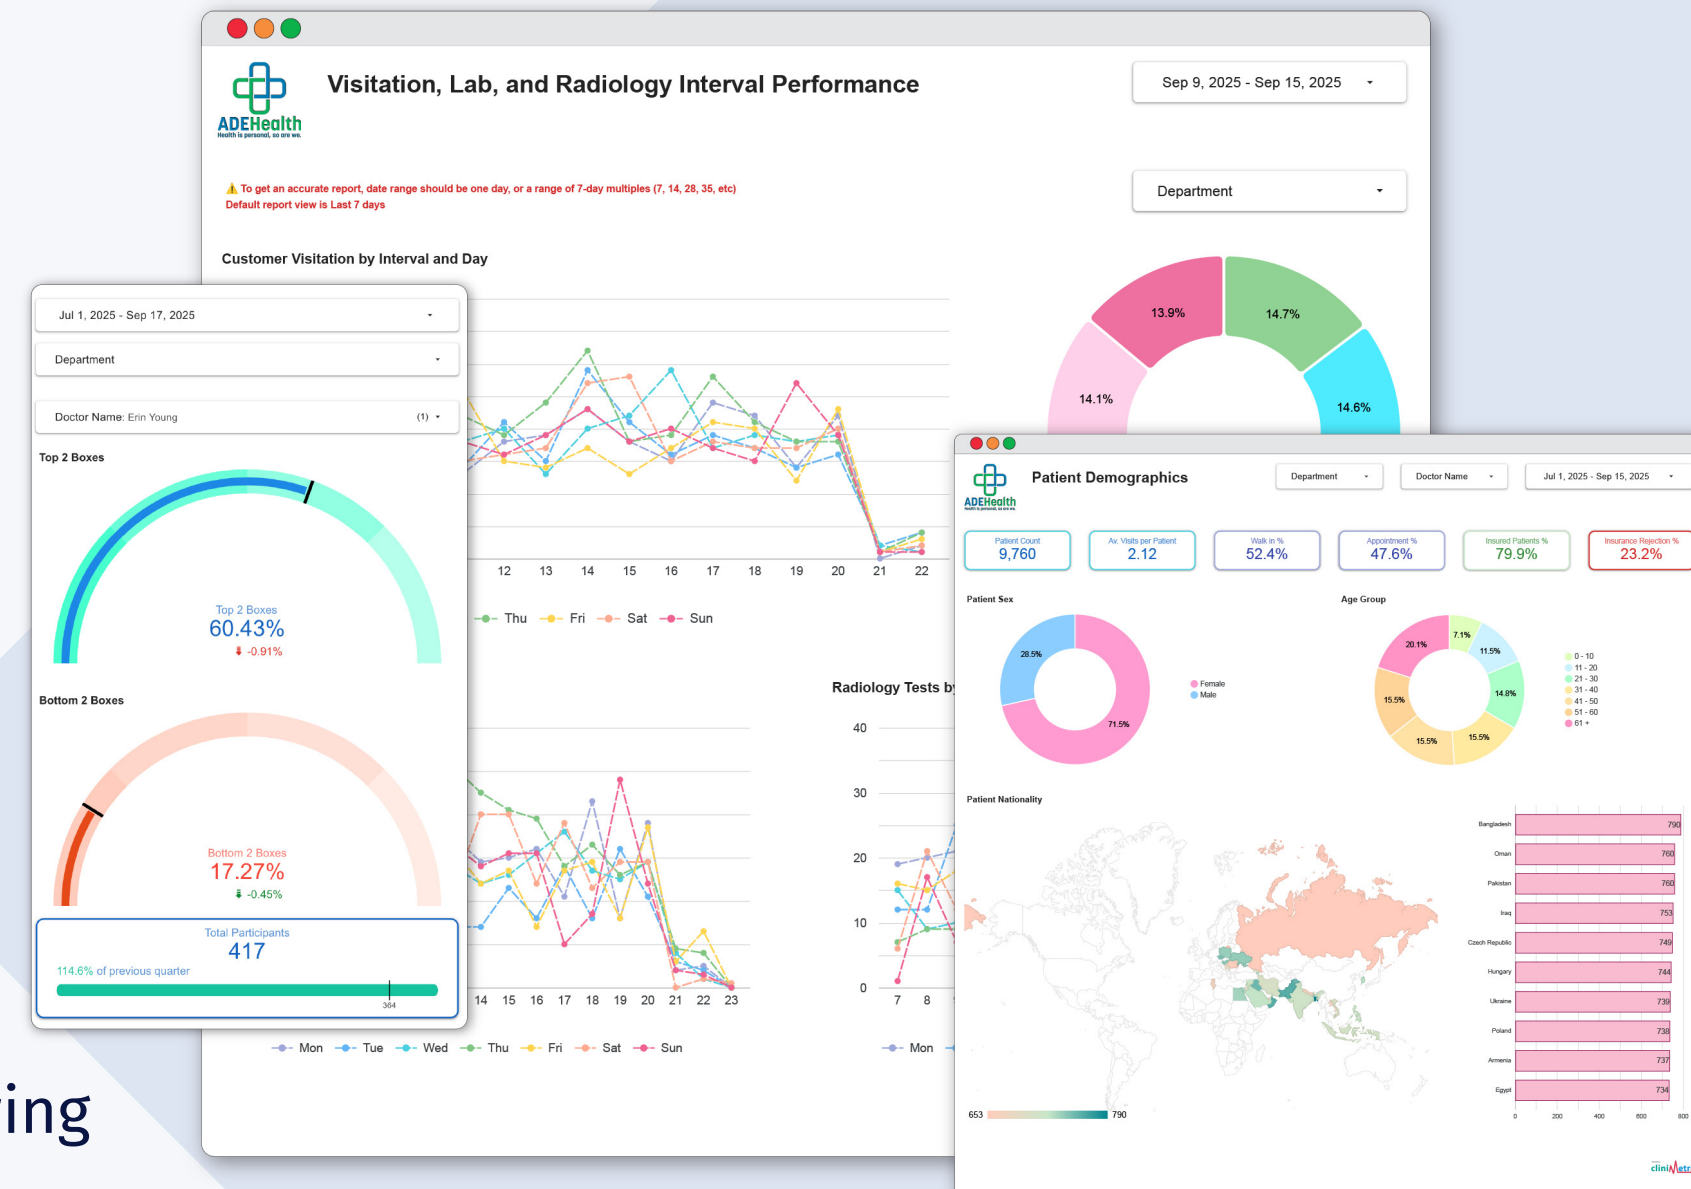

Transparent Pricing for Lasting Value.

cliniMetrics is offered as a simple, **one-time payment**. No recurring subscriptions, no hidden fees.

Your investment includes everything you need to succeed:

- Full Dashboard Setup & Customization
- Custom Data Entry Template Creation
- Team Training Session
- 6 Months of Included Technical Support

This isn't just a report; it's a permanent asset for managing and growing your clinic.
